

The Cofense Customisation Portal homepage features a central header with the Cofense logo and the title "Cofense Customisation Portal". Below the header is a sub-header: "Create, customise, and manage email, education, and e-learning templates that engage your team and strengthen security awareness." A navigation bar below the sub-header includes tabs for "Emails", "Newsletters", "Education", "Infographics", "Videos", and "E-Learning". A search bar with placeholder text "Search thousands of email templates..." and a "Search" button are positioned next. Below the search bar are filter options: "SEG Misses", "Theme", "Languages", "Industry", "More Filters", "Bookmarked", and "My Content". The main content area displays five placeholder cards for email templates.

The Brand Kit Manager interface has a header with the title "Brand Kit Manager", a "Reset to Default" button, and a "Save Brand Kit" button. A sub-header below the title says "Manage your brand assets and apply them across all templates." The interface is divided into several sections:

- Logo Upload:** A dashed box for uploading a logo with a "Upload a file or drag and drop" instruction and a note about file type and size (JPG, JPEG, PNG, GIF, WebP up to 10MB).
- Brand Colours:** A section for choosing colors for buttons, highlights, and headers. It shows a color palette with three primary colors (blue, red, green) and a plus sign for adding more. A large color picker shows a gradient from dark purple to light blue, with a color wheel and hex code "#4F46E5" (100%). A "Saved colors" section shows a grid of colored circles.
- Brand Fonts:** A section for selecting fonts. It shows a dropdown menu currently set to "Inter".
- Upload fonts:** A dashed box for uploading fonts with a "Upload a file or drag and drop" instruction and a note about file type and size (WOFF, WOFF2, TTF, OTF up to 10MB).

Essential Tips to protect your digital identity

**Recognize Phishing Attempts**

Cybercriminals often use deceptive emails to trick users into revealing sensitive information. Always verify the sender's email address, look for grammatical errors, and be cautious of urgent requests for personal data.

**Use Strong Passwords**

Create unique passwords for each account using a combination of uppercase and lowercase letters, numbers, and special characters. Consider using a password manager to keep track of your credentials securely.
